Job Recruitment and Applicant Management System

Candidate Registration • Qualification Filtering • Interview Scheduling • File-Based Records

Student Name

B. GANGA JAYADEV REDDY(192472248)

K. Prem Kumar(192572051)

K. Venkata Ramcharan Teja(192525325)

Guide Name

Dr. K. Saravanan

Problem Statement

- Manual recruitment is time-consuming.
- Large amount of paperwork is required.
- Difficult to manage applicant records.
- Interview scheduling is not organized.
- Qualification verification takes more time.
- Higher chances of human errors.

INTERVIEW TIMELINE

Each candidate is assigned a fixed date and time slot, stored permanently through file handling.

Abstract

- Automates the recruitment process.
- Manages job vacancies efficiently.
- Registers applicant details.
- Filters candidates based on qualifications.
- Schedules interviews systematically.
- Stores records securely using file handling.
- Improves recruitment efficiency and accuracy.

Existing System

- Manual applicant registration
- Paper-based records
- Difficult qualification verification
- Interview scheduling issues
- Data redundancy
- Slow recruitment process

Literature survey

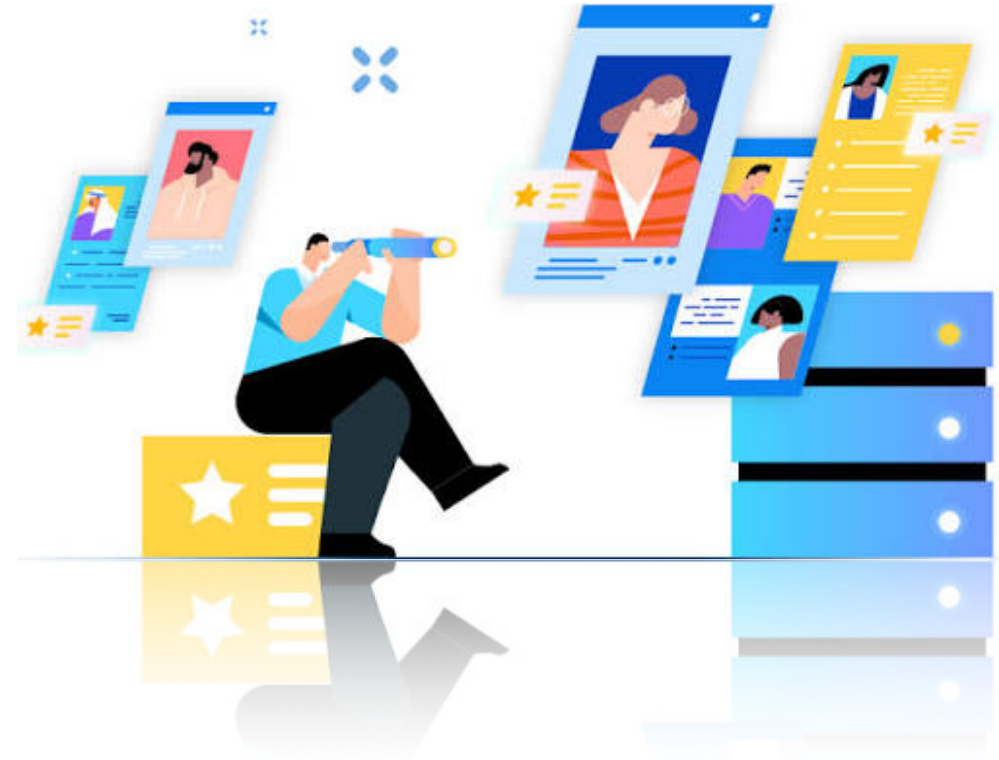

Paper Title	Key Findings	Limitation
Online Recruitment Management System	Automates job posting, applicant registration, and interview scheduling through a web-based platform.	Requires internet connectivity and database management.
Human Resource Recruitment System	Simplifies candidate registration, qualification filtering, and recruitment tracking.	Mainly designed for large organizations and requires advanced software infrastructure.
Applicant Tracking System (ATS)	Automatically screens resumes and manages candidate applications efficiently.	AI-based screening may overlook suitable candidates and requires database support.
File-Based Employee Recruitment System	Stores applicant records using file handling and provides basic recruitment management.	Limited scalability and lacks advanced features such as online applications and notifications.

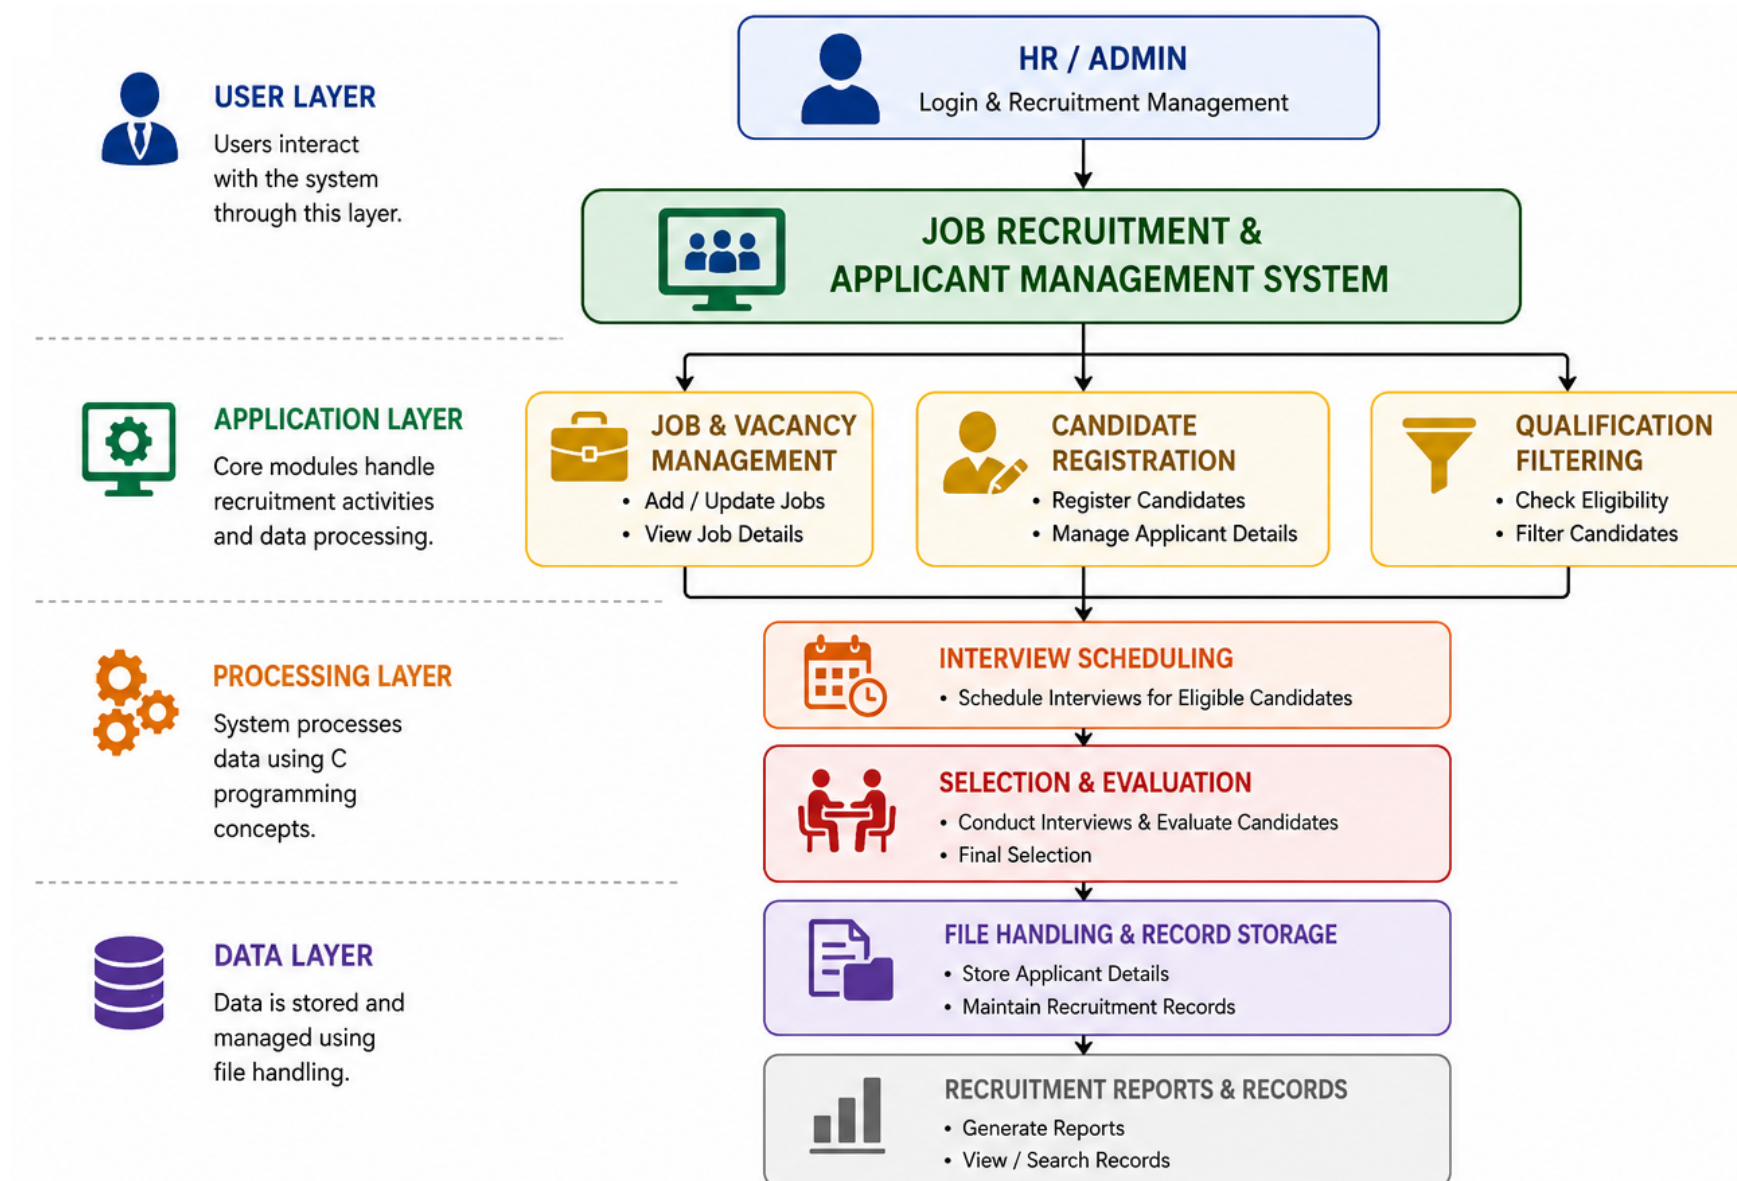

Proposed System

- Automates the complete recruitment process.
- Manages job vacancies digitally.
- Registers and stores applicant information.
- Filters candidates based on qualifications.
- Schedules interviews automatically.
- Maintains records using file handling.
- Reduces manual effort and improves efficiency.

Architecture diagram

Module 1. Job & Vacancy Management

- Add new job vacancies.
- Enter job details like job title, department, skills, and salary.
- Update or remove job vacancies.
- Show available jobs to applicants.
- Track the number of vacancies.

Module-2

Applicant Registration & Qualification Filtering

- Applicants enter their personal and educational details.
- Store applicant information in the system.
- Check qualifications and required skills.
- Filter candidates based on eligibility.
- Select suitable candidates for the next step.

Module-3

Interview Scheduling & Selection Record Management

- Schedule interviews for selected candidates.
- Store interview date, time, and location.
- Record interview results and feedback.
- Mark candidates as Selected or Rejected.
- Maintain selection records for future reference.

SMART TALENT ACQUISITION

One portal. Every hiring stage.

Candidate applications on one side. HR and hiring managers on the other.
Automated qualification, interviews, notifications and final decisions—all
connected.
